

CardioVision

We Have a Vision.

clearly
a better choice

2.4 Ghz Transmitter

Super slim transmitter design fits behind flat screens mounted on walls

2.4 Ghz Wireless Transmitter Kit

Over a year ago we began our quest to bring the same high quality we've offered in personal viewing screens to a wireless transmitter/receiver product. It was worth the wait! Our 2.4 Ghz wireless system offers 14 channels of CD quality sound, double the range of 900 mhz and FM based transmitters, and all the great support you've come to expect from CardioVision

- Frequency: 2.4GHz - 2.483GHz
- Frequency Response: 20Hz-20kHz
- Channel for selection: 14 Channels
- Channel Spacing: 6MHz @14Ch
- Supply Voltage: 3.3VDC/5VDC
- Signal to Noise Ratio: 85dB (Typical)
- Separation: 80dB (Typical)
- Distortion: <0.1%
- Range: 200 Meters (Line of sight)
- Transmitter Power: 18dBm
- Transmitter Power Consumption: 150mA @18dBm(5VDC)
- Transmitter Audio Input: Line Stereo (RCA, 3.5mm)
- Receiver Sensitivity: -90dBm (Typical)
- Receiver Power Consumption: 85mA (5VDC)
- Receiver Audio Output: Line Stereo (3.5mm)
- Receiver mode: Diversity

2.4 Ghz Receiver

Extended range, CD quality sound and features a replaceable headphone jack
